

the absolute sound®

REL T5/REL R-218

Fast and tight, yet tonally supple, with well-defined timbres, these mini-sub speakers are also remarkably potent for a single 8" driver (the T5) or a single downward-firing 10" (the Class D amp-equipped R-218). The sumptuous high-gloss lacquered enclosures house inputs for high-level Neutrik Speakon (cable included), plus low-level RCA and LFE inputs. Pocket classics both.

REL R-218

the absolute sound®

REL Gibraltar G1

The powered G1 draws so little attention to itself that it may be the ideal subwoofer for those who heretofore have shunned subs. Sporting a 12" long-throw carbon-fiber driver driven by a 600W amplifier, it offers substantial gains in low-end extension and impact, even when mated with full-range loudspeakers, and improves soundstaging performance by replicating more of the hall.
