

THE REFERENCE COMPACT

No.31

REL
ACOUSTICS LTD

No.31 is nothing less than a pure reference model, sculpted from the flanks of the remarkable No.32, but using a newly developed 12" (300mm) all carbon fibre driver. Every facet of No.31 has been comprehensively upgraded and refined from its predecessor. No.31 delivers the classic Reference filter used in No.32, the same dual parametric filters, a driver that handles three times the power as its predecessor as well as 900 watts of power to deliver a truly thrilling experience.

No.31 is the No.32 for the individual that lacks only the space to install a pair or Line Array of No.32, but has otherwise a pure state of the art system.

SPECIFICATIONS

TYPE	Closed box, front firing driver	POWER OUTPUT	900 watts (RMS)
