

# REL

## 212/SX

BUYERS WILL EXPECT REL's 212/SX to drop deep and go loud – and it does – but what stands out even more than this premium subwoofer's weighty performance is its nuance, precision and sense of timing. Enabling this intoxicating mix of sheer low-frequency power and refined output are the upgrades REL has made to the spec of the previous 2015-era 212/SE. Amp and filter network have been re-engineered, the cast alloy cones of the front-firing 12in drivers and rear passive radiator are carbon-backed for improved rigidity, and a new down-firing carbon-weave radiator further tunes the bass delivery of this towering, sealed cabinet. REL's 212/SX is fit for the finest home theatres.
